

# Colours

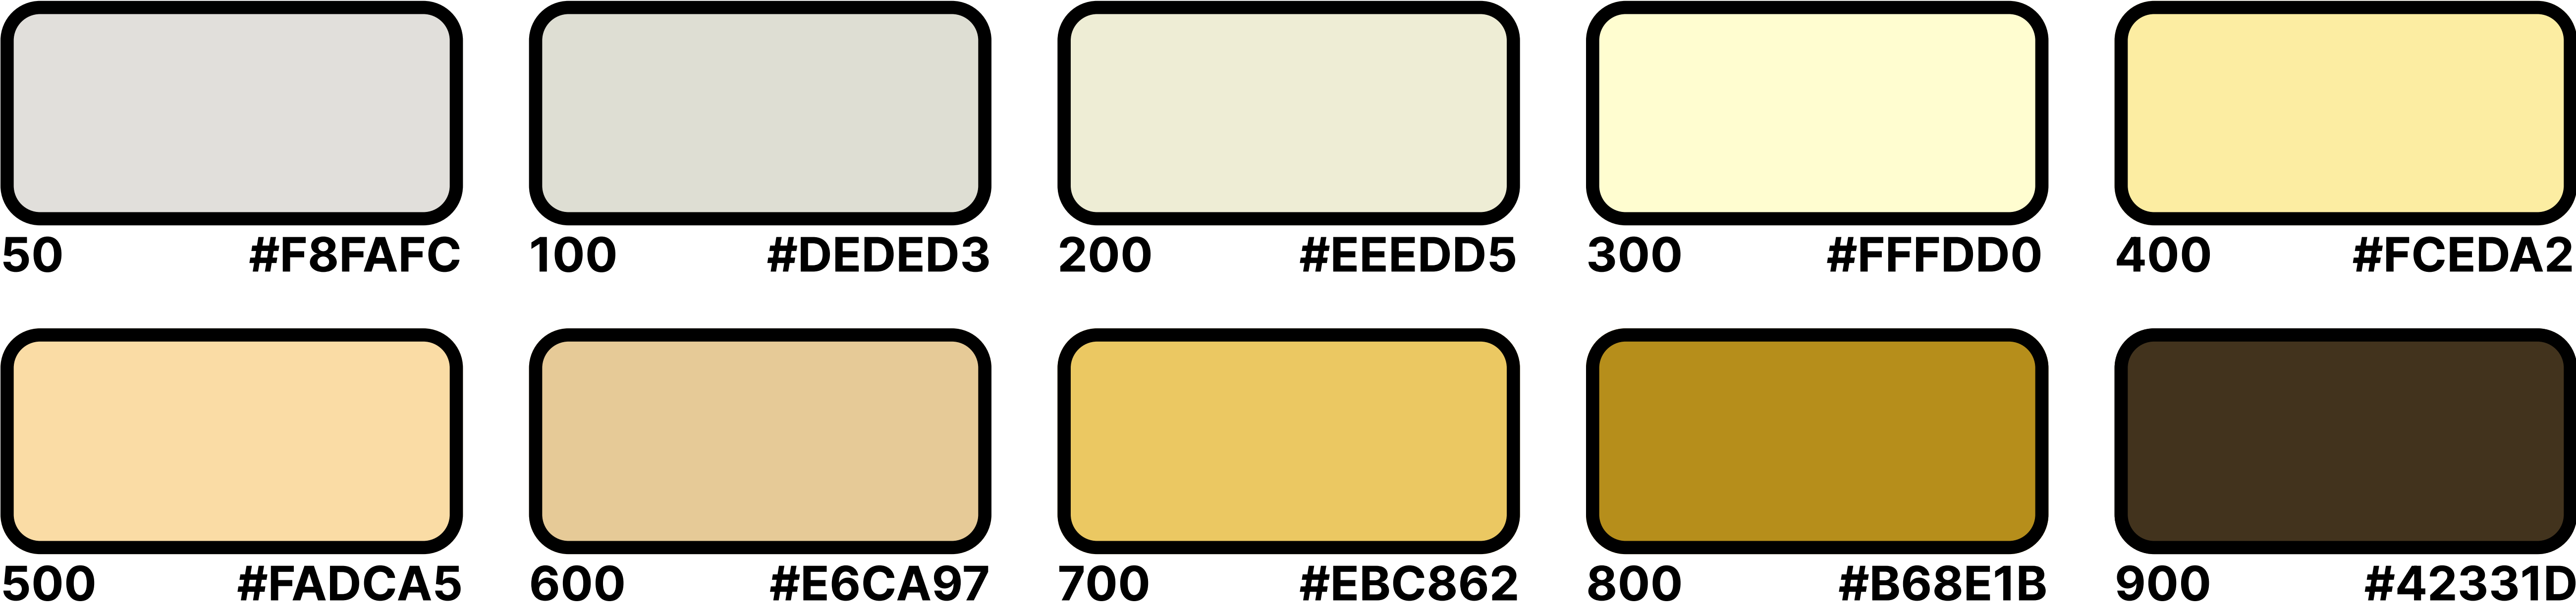

## Primary

The primary colour palette is used across all the interactive elements such as CTA's links,, inputs, active states, etc.

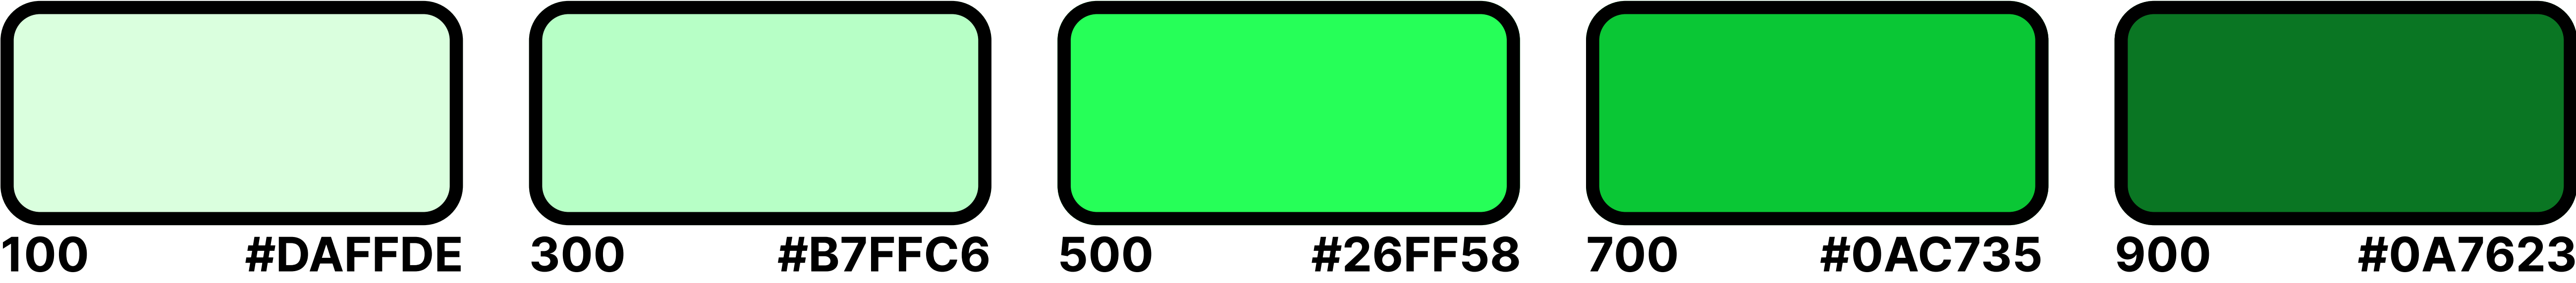

## Secondary

The secondary colour palette is used alongside the primary to indicate to the user it's the secondary focus.

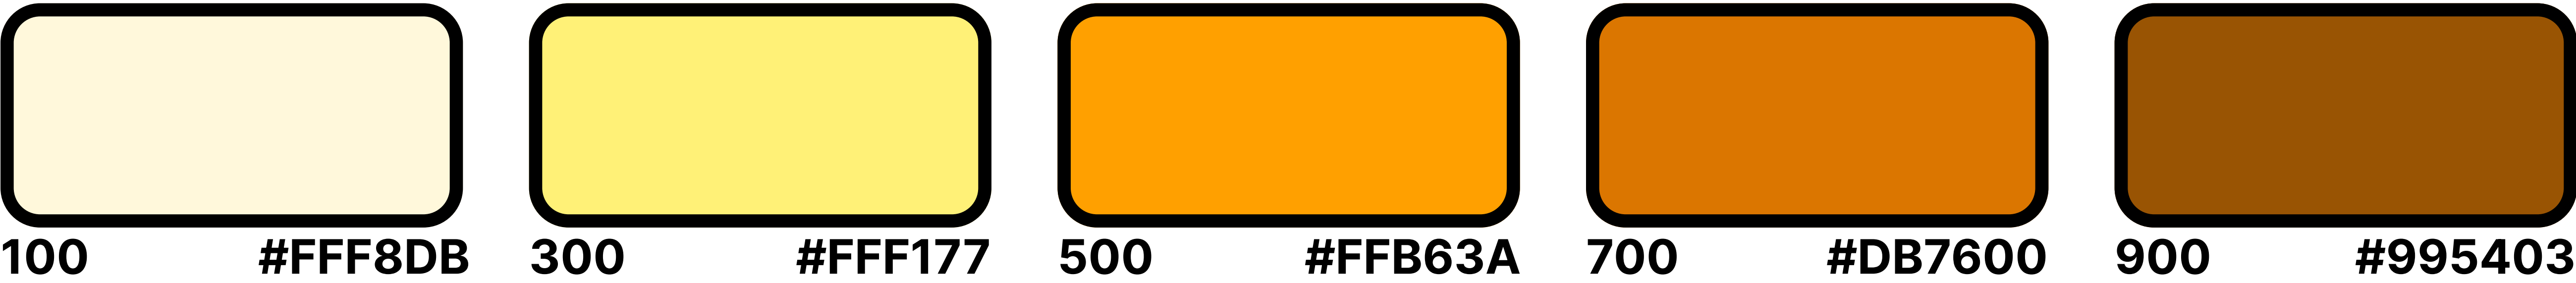

## Success

These colours depict an emotion of positivity. Generally used across success, complete states.

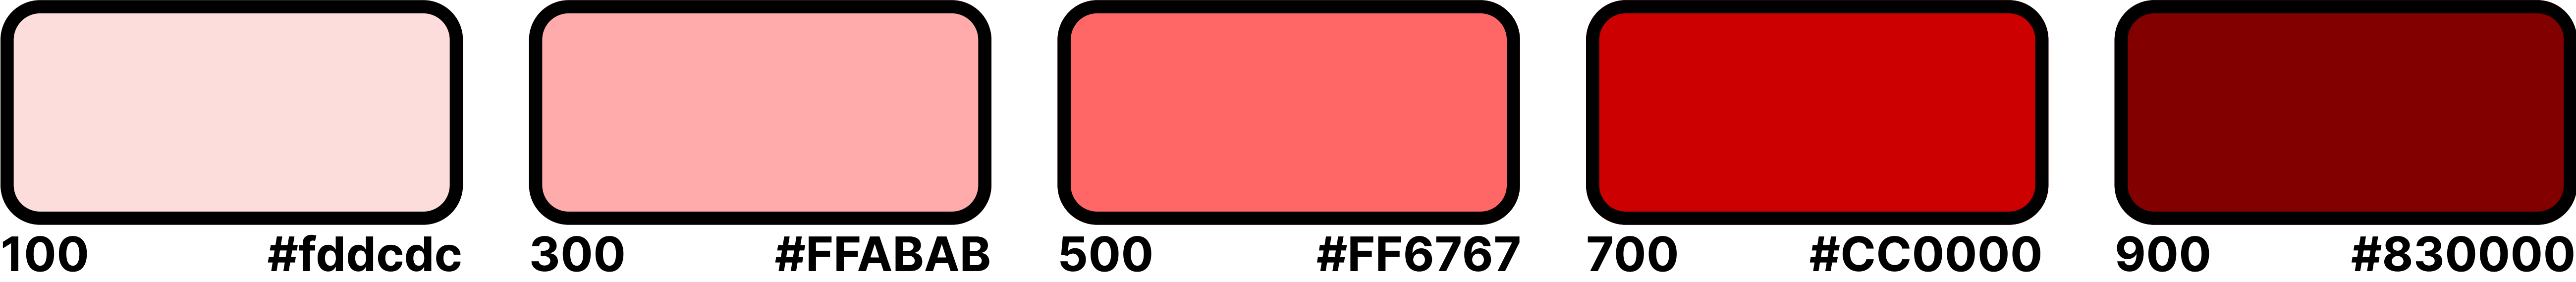

## Warning

These colours depict an emotion of holding. Generally used across warning or on-hold states.

## Error

These colours depict an emotion of negativity. ~Generally used across error states.

## Shades

These colours are used as supporting secondary colours in backgrounds, text colours, seperators, models, etc.
